Sabine Daume, Sascha Brand-Gardner and William J. Woelkerling. Community structure of nongeniculate coralline red algae (Corallinales, Rhodophyta) in three boulder habitats in southern Australia. 138–148

Wenche Eikrem and Bente Edvardsen. *Chrysochromulina fragaria* sp. nov. (Prymnesiophyceae), a new haptophyte flagellate from Norwegian waters. 149–155

Book Review 156–157

List of Reviewers 158
Published 16 July 1999

VOLUME 38, NUMBER 3, MAY 1999

Monica E.A. Schoenwaelder and Margaret N. Clayton. The presence of phenolic compounds in isolated cell walls of brown algae 161–166

Silvia M.P.B. Guimarães and Mutue T. Fujii. Morphological studies of five species of *Peyssonnelia* (Gigartinales, Rhodophyta) from southeastern Brazil 167–183

O. De Clerck and E. Coppejans. Two new species of *Dictyota* (Dictyotales, Phaeophyta) from the Indo-Malayan region 184–194

Marianne Østergaard Jensen and Øjvind Moestrup. Ultrastructure of *Chrysochromulina ahrengotii* sp. nov. (Prymnesiophyceae), a new saddle-shaped species of *Chrysochromulina* from Danish coastal waters 195–207

J. Craig Bailey. Phylogenetic positions of *Lithophyllum incrustans* and *Titanoderma pustulatum* (Corallinaceae, Rhodophyta) based on 18S rRNA gene sequence analyses, with a revised classification of the Lithophylloideae 208–216

Ioannes Tsekos, Nicolas Orologas and Werner Herth. Cellulose microfibril assembly and orientation in some bangiophtye red algae: relationship between synthesizing terminal complexes and microfibril structure, shape and dimensions 217–224

Shinya Uwai and Michio Masuda. *Kintarosiphonia* (Rhodomelaceae, Ceramiales), a new red algal genus based on *Pterosiphonia fibrillosa* Okamura from Japan. 225–233

Giuseppe C. Zuccarello, John A. West and Robert J. King. Evolutionary divergence in the *Bostrychia moritziana/B. radicans* complex (Rhodomelaceae, Rhodophyta): molecular and hybridization data 234–244

G. Robin South and Posa A. Skelton. *Amansia paloloensis* sp. nov. (Rhodomelaceae, Rhodophyta) from Samoa, South Pacific 245–250

Book Review 251–252
Published 16 August 1999

VOLUME 38, NUMBER 4, JULY 1999

Michio Masuda and Kathy Ann Miller. A new species of *Odonthalia, O. uniseriata* (Ceramiales, Rhodophyta), from the Aleutian Islands, Alaska. 253–260

Morgan L. Vis and Robert G. Sheath. A molecular investigation of the systematic relationships of *Sirodotia* species (Batrachospermales, Rhodophyta) in North America 261–266

Kazuyuki Miyaji. A new type of pyrenoid in the genus *Rhizoclonium* (Cladophorales, Chlorophyta) 267–276

Donatella Serio, Mario Cormaci and Giovanni Furnari. *Osmundea maggsiae* sp. nov. (Ceramiales, Rhodophyta) from the Mediterranean Sea 277–282

A.T. Lombardi and A.A.H. Vieira. Lead- and copper-complexing extracellular ligands released by *Kirchneriella aperta* (Chloroccocales, Chlorophyta) 283–288

Marianne Ellegaard and Øjvind Moestrup. Fine structure of the flagellar apparatus and morphological details of *Gymnodinium nolleri* sp. nov. (Dinophyceae), an unarmored dinoflagellate producing a microreticulate cyst 289–300

Christopher J.S. Bolch, Andrew P. Negri and Gustaaf M. Hallegraeff. *Gymnodinium microreticulatum* sp. nov. (Dinophyceae): a naked, microreticulate cyst-producing dinoflagellate, distinct from *Gymnodinium catenatum* and *Gymnodinium nolleri*. 301–313

S.A. Spaulding, J.P. Kociolek & D. Wong. A taxonomic and systematic revision of the genus *Muelleria* (Bacillariophyta) 314–341

Book Reviews 342–343

Published 22 September 1999

VOLUME 38, NUMBER 5, SEPTEMBER 1999

Andrey A. Gontcharov and Masayuki Watanabe. *Brachytheca sulcata* gen. et sp. nov. (Desmidiaceae, Chlorophyta), a new alga from the highlands of Papua New Guinea 345–348

Brian S. Anderson and Michael S. Foster. The effects of insolation and grazing on populations of the splash zone alga *Prasiola meridionalis* (Chlorophyta) 349–355

Mitsunobu Kamiya, Jiro Tanaka, Robert J. King, John A. West, Giuseppe C. Zuccarello and Hiroshi Kawai. Reproductive and genetic distinction between broad and narrow entities of *Caloglossa continua* (Delesseriaceae, Rhodophyta) 356–367

M. Lürling and W. Beekman. Grazer-induced defenses in *Scenedesmus* (Chlorococcales, Chlorophyceae): coenobium and spine formation 368–376

F. Hoe Chang. *Gymnodinium brevisulcatum* sp. nov. (Gymnodiniales, Dinophyceae), a new species isolated from the 1998 summer toxic bloom in Wellington Harbour, New Zealand 377–384

Sanjay Nagarkar and Gray A. Williams. Spatial and temporal variation of cyanobacteria-dominated epilithic communities on a tropical shore in Hong Kong 385–393

Olivier De Clerck, Michael J. Wynne and Eric Coppejans. *Vanvoorstia incipiens* sp. nov. (Delesseriaceae, Rhodophyta) from Tanzania, East Africa 394–400

Rafael Riosmena-Rodriguez, Wm. J. Woelkerling and Michael S. Foster. Taxonomic reassessment of rhodolith-forming species of *Lithophyllum* (Corallinales, Rhodophyta) in the Gulf of California, Mexico 401–417

Jürgen Marquardt, Albrecht Schultze, Vera Rosenkranz and Werner Wehrmeyer. Ultrastructure and photosynthetic apparatus of *Rhodella violacea* (Porphyridiales, Rhodophyta) grown under iron-deficient conditions 418–427

Tse-Min Lee, Chuan-Chuan Tsai and Ming-Chiao Shih. Induction of phosphorus deficiency and phosphatase activity by salinity (NaCl) stress in *Gracilaria tenuistipitata* (Gigartinales, Rhodophyta) 428–433

Published 5 November 1999

VOLUME 38, NUMBER 6, NOVEMBER 1999

David Mann. The species concept in diatoms. (Phycological Reviews 18) 437–495

Kazuhiro Kogame, Takeo Horiguchi and Michio Masuda. Phylogeny of the order Scytosiphonales (Phaeophyceae) based on DNA sequences of *rbc*L, partial *rbc*S and partial LSU nrDNA 496–502

G.R. Krishna Kumar, M.K Addeppali and C.R.K. Reddy. Regeneration of the thallus of *Monostroma oxyspermum* (Chlorophyta) from protoplasts in axenic culture 503–507

E. Paasche. Reduced coccolith calcite production under light-limited growth: a comparative study of three clones of *Emiliania huxleyi* (Prymnesiophyceae) 508–516

Tara L. Rintoul, Robert G. Sheath and Morgan L. Vis. Systematics and biogeography of the Compsopogonales (Rhodophyta) with emphasis on the freshwater families in North America 517–527

Satoshi Shimada, Takeo Horiguchi and Michio Masuda. Phylogenetic affinities of genera *Acanthopeltis* and *Yatabella* (Gelidiales, Rhodophyta) inferred from molecular analyses. . . . 528–540

Aud Larsen. *Prymnesium parvum* and *P. patelliferum* (Haptophyta)—one species. (Research Note) 541–543
